

GTeX. A world of spatial ideas.
Atlanta, Georgia

What is GTeX?

GTeX was born out of the idea that only by bridging the gaps, could geospatial technology fulfill its promise; the promise of **communicating and sharing spatial** data in order to make better decisions.

From the beginning of our planning process, our goal has been to bring a diverse group of **Atlanta-based technology vendors, organizations and public sector professionals** together to discuss ways to work hand-in-hand to bridge these gaps.

The challenge is not an easy one. There are gaps everywhere. Between technologies, between the public and the private sector. between neighboring states. There are computer literacy gaps.

We knew it would need to evolve into an **ongoing dialogue and partnership** for the idea to succeed but when Hurricane Katrina hit the Gulf Coast; we saw how big the task really is. We have also witnessed how urgent it has become.

If you have any questions or to register please call 800-948-1952 ex.863 or visit www.asti.com

We look forward to seeing you on **Thursday, October 20th**.
